AMMAN, JORDAN

OBJECTIVE

I'm a software engineer who enjoys building functional systems and working through technical problems. I manage IT infrastructure and development teams, focusing on turning requirements into working applications. I'm interested in understanding how different teams operate and what they actually need from their tools. I'm looking for opportunities to work on projects that let me develop both my technical skills and my ability to understand business requirements. I believe good software requires understanding the people who use it, and I'm actively learning better ways to approach that.

SKILLS & ABILITIES

Programming Languages

- C#, Java, PHP, JavaScript, Visual Basic, X++, TypeScript

Web Development

- HTML5, CSS3, JavaScript (ES6+), SQL, RESTful APIs,
- React, React Native, Tailwind CSS, jQuery, Canvas API, hls.js

Enterprise & Systems

- Microsoft Dynamics 365 (F&O), Node.js, Power Apps, Power Automate

Software and Tools

- Visual Studio, Visual Studio Code, MySQL Workbench, Microsoft Office Suite,
- Git, Azure DevOps, Android Studio, phpMyAdmin, Hostinger, Zed,
- Claude Code, AI-Assisted Development

Database Management

- MySQL database design and management
- secure data storage integration

Software Engineering Skills

- Object-Oriented Programming (OOP)
- Software Development Life Cycle (SDLC) understanding
- Problem-solving and debugging techniques
- API integration and backend development

Languages

- Arabic: Native
- English: Upper-Intermediate

EXPERIENCE

06/2021 – Present

Web Developer & IT Manager

Amman, Jordan

Malak Travel and Tourism

Built and maintained the company website, including a custom HTML5 video player with adaptive bitrate streaming, social feed integrations, Google reviews, and contact forms. Developed an internal booking management system with MySQL database integration. Managed all internal IT infrastructure and systems. Ensured code quality through debugging, testing, and regular maintenance.

02/2026 – 05/2026

Technical Consultant D365 (Internship) – Microsoft Dynamics 365

Amman, Jordan · Remote

Dynify Solutions

Developing custom modules for Microsoft Dynamics 365 Finance and Operations using X++. Working within a dedicated AOT model against a cloud-hosted D365 environment using Visual Studio and Azure DevOps.

EDUCATION

Graduated: March 2025

International Diploma in Software Engineering

Luminus Technical University College – Amman, Jordan

Accredited by Pearson University

Completed a comprehensive curriculum focused on software development, database management, system analysis, and project management. Gained practical experience in web development, mobile application design, and cloud computing through hands-on projects and collaborative assignments. Developed a strong foundation in programming languages including Java, C#, and SQL, with an emphasis on writing clean, efficient, and maintainable code. Enhanced critical thinking, problem-solving, and team collaboration skills through real-world simulations and industry-driven case studies.

PROJECTS - WORK

CINÉMATHÈQUE – Movie & TV Streaming Platform – [Live Demo](#)

Full-featured streaming app with TMDB API integration, multi-server video player, search, filters, and watchlist. Mobile-optimized with touch controls and GPU-accelerated animations.
